

AR CHARCOAL

OENOLOGICAL CHARCOAL

APPLICATION

DOLMAR AR CHARCOAL is a vapour-activated charcoal which presents a broad range of applications.

It is particularly recommended for the elimination of anomalous odours that are sometimes present in musts and wines.

COMPOSITION

DOLMAR AR CHARCOAL is an activated vegetable charcoal.

As with all activated charcoals, its use is authorised in doses of up to 100 g of dry product per hectolitre.

The above information is based on our current knowledge. It is provided without any kind of guarantee on our part as its conditions of use are beyond our control. This information does not exempt the user from compliance with any applicable legislation or health and safety procedures.

DOSAGE

Dose: 20 – 100 g/hl.

USE

Add 1 kg of product for every 10 l of liquid.

After treatment, clarify or filter the liquid to remove all traces of the charcoal.

PRESENTATION

Bags of 1 kg.

STORAGE CONDITIONS

Full, unopened pack in perfect conditions: store out of direct sunlight in a dry and odourless environment.

Once open, use quickly.
