

Innovative liquid fermentation aid combining Efficiency, Ease and Security

ViniLiquid

DESCRIPTION

ViniLiquid is a natural and efficient fermentation activator manufactured in order to benefit from the **optimized synergy between both soluble and insoluble parts of highly degraded autolyzed yeasts**. Its **innovating liquid form makes winemakers' work easier**. It is particularly adapted for wineries facing **operational time reduction issues** and/or **difficult fermentable musts** i.e. with low available nitrogen, poor vitamins composition, survival factors deficiency, etc... and rich in fermentable sugars (high potential alcohol).

PROPERTIES

FERMENTATIVE EFFICIENCY

Fermentis® works showed that both soluble and insoluble parts of a fully autolyzed yeast are respectively of great interest regarding fermentation activation.

- The **soluble part** containing a concentrated pool of free amino acids **has a much stronger fermentative power than sole ammonium source** helping winemakers reaching **faster and more complete fermentations**.
- The **insoluble part (i.e. yeast hulls)** has an **important kinetic impact** alone and improves the **fermentative efficiency of the initial nitrogen supplement**.

Based on these results, **ViniLiquid** has been developed to **naturally combine these synergetic effects**.

Thanks to its liquid form, the direct effect of ViniLiquid on the yeasts creates a **spectacular fermentation speed increase** when added between 1/3 and 1/2 fermentation. Its supply leads to an **important cellular regrowth** and **viability maintenance** allowing a fast and clean fermentation achievement, **especially in combination with an initial oxygen supply**.

When added before malolactic fermentation its **micro peptide pool** is particularly interesting for the growth and the performance of lactic bacteria.

EASY-TO-USE

- **Direct use** in the must without prior dissolution,
- **Total dispersibility into the must** without any homogenization problems,
- **Pumpable and homogenous**, ready to inject manually or via **automatized systems**.

SECURITY

ViniLiquid **liquid form eliminates the risk of inhalation related to highly dusty products**.

The obvious choice for beverage fermentation 

TRIAL

Chardonnay must 2011, 12.7% v/v, initial YAN: 188ppm

The use of ViniLiquid in comparison with the totally equivalent dry recombined product (Yeast derivative YD + Springcell yeast hulls) showed better performances in terms of fermentation completion due to a direct assimilation of the nutrients allowed by its liquid form.

DOSAGE

Due to its strong fermentation power, Fermentis® recommends to use:

50 ml/hl of ViniLiquid for an equivalent supply of 20 mg/l of Yeast Available Nitrogen

For a maximum efficiency, use ViniLiquid **between third and mid-fermentation** and combine its addition with:

- Oxygen addition 24-48hrs after yeast inoculation,
- DAP and Bioferm equal dose addition at yeast inoculation when initial YAN is not sufficient (<150-180mg/l depending on the yeast used),
- An extra addition of DAP at the same addition time in case of musts very poor in nitrogen and/or with a high potential degree of alcohol.

To restart a stuck fermentation: 50ml/hl in the yeast starter

As a malolactic fermentation (MLF) activator: 25 to 50ml/hl before MLF depending on the alcohol content

COMPOSITION

Saccharomyces cerevisiae autolyzed yeasts; D,L Malic acid (E296); Potassium metabisulfite (E224)

PACKAGING

12kg PEHD jerry can

210kg PEBDL big bag in Easyliquid packaging

GUARANTEE

Fermentis® guarantees an optimum storage of this product during 2 years in its original packaging at a temperature of maximum 20°C and in a dry place. Fermentis® guarantees the product is conforming to the International Oenological Codex until its Best Before End Date in the storage conditions mentioned above.

Fermentis® fermentation aids and functional products are exclusively produced from natural yeast products. The Know-how of the Lesaffre group guarantees end users, high performing products as required by modern oenological applications.

The data contained in this technical sheet are the exact transcription of our knowledge of the product at the mentioned date. They are the exclusive property of Fermentis®-Division of S.I.Lesaffre. It is of the uses responsibility to make sure that the usage of this particular product complies with the legislation.
